

PRE-INSTALLATION MEASURING GUIDE

DETERMINE THE PERFECT POSITION TO INSTALL YOUR AWNING

- A.** The minimum recommended height is 2500mm above the ground
However, it is better to install the folding arms higher so that the sloping angle is bigger
- B.** Please ensure a minimum 30mm clear space below the roof, eave or overhang
- C.** Leave at least 300mm of uninterrupted vertical space for the installation of your awning
- D.** A minimum of 3000mm width is recommended
